SUMMARY

As a data scientist, I feel at ease working with large datasets and a range of data manipulation techniques because I have a strong background in computer science, statistics, and data analysis. Python and several different data science tools and frameworks are among my technical skills. I've concentrated on developing prediction models and data visualizations for the purpose of disseminating findings.

EXPERIENCE

Intern - Product Management Team
Soloti Gaming Limited

- Assisted customers with product inquiries, providing accurate and detailed information about product features and benefits.
- Tested completed projects for functionality and implemented changes to production methods to rectify issues in final products.
- Collaborated with design team to identify and manage project deliverables for customer orders.

Intern -Engineering Team
Center4Tech

- Reported back to instructor to receive day-to-day tasks and responsibilities.
- Reported to the instructor to get daily duties and responsibilities. produced reports to track student performance while keeping an eye on their growth.
- Developed and implemented lesson plans based on student needs and abilities, resulting in improved student engagement and satisfaction.

EDUCATION

BSC Computer Science
Fountain University

2019 - 2023

Second Class
(Upper Division)

A Level

Lagos State University

2018 - 2019

SKILLS

Python	Scikit - Learn	Data Analytics
Machine Learning	Power Bi	Research Skills
Apache	SQL	

KEY ACCOMPLISHMENT

Implemented and designed a machine learning system
It accurately identified pest-affected plants with a rate of more than 80%

SOFT SKILLS

- Teamwork
- Research Skills
- Problem-Solving
- Critical Thinking
